### PROFILE

I am a full-stack developer with 4-5 years of experience specializing in PHP. Over the years, I've worked extensively with various PHP frameworks, including Laravel, Symfony, and CodeIgniter. I am also proficient in Vue 3, HTML, CSS, and JavaScript, enabling me to create robust and userfriendly applications. In my previous roles, I have consistently taken ownership of projects by identifying solutions, implementing them, thoroughly testing, and delivering high-quality results. I excel at communicating with non-technical stakeholders, understanding their vision, proposing practical solutions, and executing them effectively. For the past two years, I have been freelancing, primarily collaborating with AlfaDevelopers on B2B projects, while also working with other clients to deliver tailored software solutions.

Recently completed Cisco's Introduction to Cybersecurity course and earned a digital badge: [View credential](#).
